HAFNER

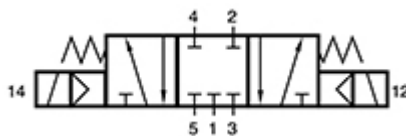

(HU) 5/3-as elekt. vezérlésű alaplapos szelep, középáll. zárt - DN7 - hidegálló

## Technical data

|                                    |                                              |
|------------------------------------|----------------------------------------------|
| Port size / Connection             | For manifolds                                |
| Medium                             | Compressed air                               |
| Function                           | 3-position, centre closed                    |
| Temperature range                  | -50...+50°C                                  |
| Port orientation                   | On the bottom for manifold assembly          |
| Operating pressure                 | 3...10 bar                                   |
| Air flow rate (P1=6 bar, ΔP=1 bar) | 1250 l/min                                   |
| Orifice size                       | DN 7                                         |
| Mounting type                      | Valve for manifold / valve terminal mounting |
| Power consumption                  | 3 W / 5 VA                                   |
| Ways                               | 5/3-ways                                     |
| Material body                      | Aluminum                                     |
| Switching time                     | 50 ms   6 bar, +20°C                         |
| Actuation                          | Electrically actuated                        |
